### VULCAN LOCALS.

Mr. Howard Nixon spent the weekend in Calgary.

Mrs. John Fyten and three children, of Swallow, Alberta, are visiting Mr. and Mrs. M. B. Rutten.

The rural mail deliveries were postponed last week on account of the impassable conditions of the roads.

Miss Anne K. Nixon, of Lower Brighton, N.B., arrived in town Monday night to pay her brother Howard a short visit.

The condition of the roads precludes the use of automobiles and the farmers coming to town have reverted to old Dobbin and the sled or buggy.

Mrs. William McCutcheon and the children, who have been visiting in Toronto for the past two months, returned to Vulcan last Thursday.

It is rumored that there are other than business reasons why Mr. Sid Northcott is very anxious to take a trip to England. Ask Sid.

The trails around the country are impassable for motor travel owing to the deep snow and drifts, but the sleighing is good and much travel is seen in this manner.

The town council request that every household carefully read the cards distributed in regard to fire protection and be guided by the counsel set forth therein.

Mr. Watt is endeavoring to put the local skating rink into shape for use for the coming winter, but the numerous and severe snow storms are holding back progress. He hopes to soon have the rink going, however.

Miles Anderson, formerly connected with the Co-Operative Company, sold his Ford car, which is rigged with a coyote hunting device, to Herman & Herman, and left for Calgary on Saturday night where he will reside in future.

Coal is being brought into the village from the neighboring mines on sleighs, and good sized loads are capable of being transported in this manner. This will relieve the coal shortage which has become acute in the Village.

The ladies of the G.W.R.I. in the Alston School district will give a dance on November 14 in the Alston School. The proceeds to be used to buy an oil stove for the use of the school children. Everyone come and help the good cause along.

Mr. R. A. Schragg was in town on Saturday on a short business trip and left for Okotoks and High River on the evening train. Mr. Schragg is kept pretty well on the move in his new position but states that the "Forward Movement" is getting nicely under way and will meet with the success anticipated in this province.

Mr. Charters, of the U. F. A. has written to the Extension Department of the University of Alberta for blank petition forms for the establishment here of a branch of their circulating library, which he hopes to get installed. The same, if obtained, will be for the benefit and use of the general public and will supply a much needed want in the matter of good reading for the winter months.

An impromptu dance was given on Friday evening, the 7th inst. at the Community Theatre which was arranged for in an hour or two and which was occasioned by the orchestra being held up here because of their inability to get to Milo where they had an engagement for that evening. About twenty-five couples were present and a good enjoyable time was had. The Imperial Hotel fed thirty-four people about midnight from the dance.

### VULCAN LOCALS.

Mr. A. McPherson, of Medicine Hat was in town Monday on business.

The sixteen rinks of the High River Curling Club are actively at it now on good sheets of ice and some interesting series are already being run off.

M. H. Odland is leaving this week for San Francisco, where he will spend the winter and return in the spring.

On Friday and Saturday last there was not a pound of coal for sale in the village and none definitely in sight, except that being brought in on sleighs by the local mines.

At eleven o'clock on Tuesday the citizens of Vulcan observed a two-minute silence period at 11 a.m. in respect to the memory of the Empire's heroic dead.

The petition for a water system will be taken to Edmonton and laid before the Commission of Public Utilities this week and upon approval there will be immediately issued a call for tenders.

The farmers of this particular locality are not bemoaning the present cold weather and heavy snow falls, as it is supplying promising conditions for next year's crops. Much grain is still in the stacks, however, waiting harvesting which is at present impossible on account of the weather conditions.

Rev. E. A. Hayes, of Tongue Creek, received the unanimous call of the Vulcan Presbyterian Church meeting called for that purpose on Tuesday, Nov. 12, to fill the vacancy caused by the resignation of the Rev. A. R. Shragg. A committee has been appointed to go to High River next week to confer on the matter with the Rev. Mr. Hayes.

The ladies of the G.W.R.I. in the Fireguard School district wish to thank all who so generously helped them to make their programme and dance a success. Although the weather was against us, we had a good crowd and our net proceeds for the evening was fifteen dollars (\$15.00). This is not enough for our purpose, so we plan to have something more in our school house at an early date.

Even the energetic coyote hunters are dubious about venturing out these days, although they assert that under present conditions the coyote is easy prey.

The Government Telephone crew of about eight men are here working on the new lines and the extensions which are now being erected to the north of Vulcan. About thirty miles of new lines are being constructed on petition of the farmers in that locality along the main trails and the cross roads leading into Vulcan. On account of the storms no motors are available and the crew are using teams for the transportation of their supplies. They came from the south country where they state no frost at all was struck in digging holes for the poles. They may find a little in this locality, at least, let us hope so.

A large Montreal cigarette and cigar manufacturer has announced that the cigarettes made by his firm will be retailed at the prices that existed before the recent raise was made.

This competition to the Imperial Tobacco Company discloses a keen competition between the above company and the manufacturers who are not associated with it. The small concerns, it is said, will offer their product at the rate of 20 cents raise per thousand on the old prices while the raise made by the Imperial Tobacco Company is \$1.70 per thousand. It looks like brighter days for the cigarette smoker, all right.

## LATE LOAN FIGURES

Local District Contributes \$20,000 to Bond Issue to Date

Although weather conditions have served to limit the free circulation of canvassers who were to comb this district on behalf of the Victory Loan, 1919, and in view of the fact that affluence is not on exactly chummy terms with our community, Mr. Colwell, district secretary of the local Loan Committee, reports \$20,000 as the total subscriptions to date.

The committee are pushing their end of the drive for the allotted quota with untiring energy and it should not be taken for granted by those who are not visited by one of the committee or a representative of the same, that their help and co-operation is not wanted or needed. The committee have been hampered in their work by unfavorable weather conditions which have foreclosed the possibility of reaching and thoroughly canvassing out-lying districts.

If you are interested in the success of the Loan and wish to subscribe, do so at once. It is as much your duty to get your name on the subscribers' list as is the duty of the committee to get it there. Don't consider the non-appearance of a Victory Loan canvasser a bit of luck that keeps money in your pocket. Be honest enough to contribute what you can afford, even though it does mean a little extra effort on your part.

And prospective subscribers must bear in mind they have only until the 15th of November, when the drive is scheduled to close.

### CURLING SCHEDULE

A schedule of the Vulcan Curling Club has been completed and drawn which consists of sixty-six games, the first to start on Friday, November 14 at which two games will be played each evening, commencing at 7.30 sharp. The schedule is as follows:

Friday, Nov. 14—Anderson vs. Charters  
Flood vs. Grant  
Monday, Nov. 17—Hall vs. Jones  
Lebow vs. Reeves  
Tuesday, Nov. 18—Spoonier vs. Torgeson  
Woolf vs. Whicher  
Wednesday, Nov. 19—Anderson vs. Flood  
Charters vs. Grant  
Thursday, Nov. 20—Hall vs. Whicher  
Jones vs. Reeves  
Friday, Nov. 21—Lebow vs. Spoonier  
Torgeson vs. Woolf

### CONCERTS PROVE POPULAR

The concerts being conducted by the Harmony Five Orchestra in collaboration with the Vulcan Band and other local talent are appreciated by the community as a welcome diversion from the more or less pronounced monotony that comes with long winter evenings.

Last Sunday night there were approximately 125 persons present at the Community Theatre and every one seemed to enjoy the program offered. The Vulcan Band opened the concert with a good selection which emphasized the progress they have made during the short while they have been a unit. Beside the several selections rendered by the Orchestra, which were all good, Mr. D. C. Jones played a saxophone solo and Mr. Henry Dorsch sang a song that was accorded hearty applause. The spirit of all the entertainers is one worthy of especial mention as it is very evident everyone with any ability or talent whatever, is perfectly willing to donate their services for a few moments for the benefit of the whole community in an effort to relieve the tedium and enliven the spirit of the town. And we believe that this spirit of co-operation is fully appreciated by everyone. Keep it up. If you can't play a fiddle or sing a song, why emphasize your appreciation by coming across with the applause.

The Dominion of Canada subscribed over \$300,000.00 on Monday last to Victory Bonds. This is a remarkable record.

## FIRE ON MONDAY

Threatening Blaze is Quickly Extinguished. \$100 Damage.

A fire which occurred on Monday night at the corner of Neptune Street and Atlantic Avenue might have resulted disastrously but for its chance discovery by Mr. Paul Wittcock, engineer at the power plant, and the prompt action of Mr. William Herman in extinguishing the same.

Mr. Glen J. Dawson, of Armada, of Armada, who is moving his household effects to his brother's home, L. F. Dawson, six miles out of town, came into Vulcan Monday evening with a sled load and drove to a position in front of the Vulcan Livery where he unhitched and quartered his team for the night. About 2 a.m. the high wind fanned the charcoal in a foot-warmer left among the robes, into a blaze which ignited adjacent inflammable material. In a few minutes the load was a roaring mass of flames. Mr. Wittcock, noticing the illumination, hurried to the scene and aroused Mr. Herman. The blaze had grown to such proportions that the contents of the fire extinguisher which Mr. Herman promptly emptied upon it was not sufficient to control it, but retarded the conflagration sufficiently to allow Mr. Herman time to carry water from the tank in the barn, which, luckily was full, and therewith completed the work of extinguishment. Meanwhile the night watchman at the hotel sent in the alarm to central and the fire-bell roused the citizens of the town to knowledge of the impending danger. Quite a number of people soon made their appearance and helped put the finishing touches to the smouldering remains. It is a good thing the wind was blowing from a direction that sparks were not carried to nearby structures or the result would have been disastrous indeed.

This incident illustrates the necessity of having adequate fire protection and extinguishers are the handiest and most efficient fire fighting apparatus available. Safety first appliances are an added assurance to precaution and everyone should have them. To be burned out under the present weather conditions is a calamity second to none. Pending the installation of a water system, everyone should purchase an extinguisher at the Fire Hall. Sixteen dollars and fifty cents is a small price to pay for safety.

## BLAMES GOVERNMENT

George Hoadley, M. L. A. Says Feed Shortage is Government's Fault.

Mr. George Hoadley, M. L. A., of Okotoks, was in here on Friday on business and dropped in at The Advocate Office for a friendly chat. He views the present shortage of feed with seriousness and says the same could have been averted and plenty of feed could have been provided for by the government if they had acted wisely two months ago when the subject was up for discussion. He blames the government, consequently, for the threatened dangers and condemns their actions at that time for not having made the necessary provisions then demanded. The subject was dropped summarily, upon the rainfall which then occurred and which relieved the situation somewhat and brightened the future prospects, but which, he claims, was no excuse or opportunity for sidestepping the then present question of feed. He predicts that, if the present weather conditions prevail, there will be larger losses of cattle by spring than was experienced in the fall of 1906-7, when many of our largest ranchers were hard put to pull through, and many suffered the loss of their entire capital. Mr. Hoadley is a stockman and has a ranch in the vicinity of Vulcan, which he visits quite regularly.

Wife: "Fred, I'm just in love with this new dress, but don't you think it is a little too tight around the bottom?"

Hubby: "Yes; and I think it is a little tight around the feet, too." Ga-Za-Zig Prints.

### U. F. A. POLICIES

That the Farmers' Government of Ontario will proceed strictly on a policy of strict economy is very evident. The policies to which they are pledged to bring forward are interesting, as shown by the following, which formed the pre-election pledges of the Farmers' Party and they cannot very well go back on the same:

"(2) To abolish the system of party patronage.

"(1) To cut out all expenditures that are not absolutely essential.

"(3) To limit Governmental activity respecting commercial co-operation to legislation facilitating co-operative effort, to the keeping of accurate records, and to general education along co-operative lines.

"(4) To provide equal educational opportunities for all the children of all the people by greatly extending and improving educational facilities in the rural districts.

"(5) To substitute for the policy of expensive Provincial highways a policy of organized continuous road maintenance, and of making good roads for all rather than high-grade roads for a few, the cost of road construction and maintenance being equitably distributed between city and country.

"(6) To promote a system of forestry which will maintain and increase the public revenues from this source, protect and perpetuate our forest resources, reforest the waste places of Old Ontario, and encourage municipalities to engage in forestation enterprises.

"(7) To encourage and cheapen Hydro-electric development and maintain effective public control over it.

"(8) To enact and enforce such prohibitory legislation against the liquor traffic as the people may sanction in the approaching referendum and as lies within the power of the Province. Prohibition is an integral part of the Farmers' platform and the United Farmers of Ontario will use its influence in that direction.

"(9) To extend the policy and practice of direct legislation through the initiative and referendum.

"(10) To apply the principle of proportional representation to our electoral methods."

### CATTLE CONDITIONS

There has been no abatement of the cold and continued fall of snow since our last issue and the weather continues very unfavorable for stock. Feeding is general and the unexpected early winter caught many cattle men unprepared for the present emergency, with the result that there is considerable feverish activity noticed in an endeavor to supply fodder. Some shipments of cattle from the south have been put through, but the general shortage of cars has made this also a problem, and as there is practically no feed at all in the south country, the prospects there look gloomy. The price of cattle there, however, does not seem to have dropped in an endeavor to unload, even though no feed for the same is in sight and high prices are being maintained, without sale. The Calgary market embargo on further receipts has also caused some serious inconveniences and cattle is noticed held up at the shipping points and are being fed there until they can be moved. The Calgary markets are glutted with cattle, so we are informed, and it will be some time before more shipments can be made to this point. The early entrance of full winter conditions also found the cattle not rounded up and the continued storm conditions have, in most instances, precluded the possibility of getting them home where they can be cared for. Much speculation is advanced as to the final outcome, if there is not a break in the weather which will allow some recuperative measures being undertaken by the stock men.

William Proudfoot, leader of the Liberal party in Ontario until a short time ago and who was refused nomination of the Liberals in his old riding, Centre Huron, and who ran as an independent and was defeated, has been appointed senator.

### EDITORIAL COMMENT

Why not abolish the Senate and be done with it. Every once in a while there is talk of Senate reform, but no action follows. Canada has absolutely no use for the institution, so let us kill it.

The Farmers' Sun of Ontario, in an editorial says the chief reason why the farmers of Canada will seek to overthrow Union Government is because that government, during the war, first promised to exempt farmers' sons from military service and later conscripted them. What a horrible excuse.

There will be further conferences between the soldiers and the Union Government on the subject of gratuities and in every case where there is reasonable need for assistance, it will no doubt be attended to. So says Hon. Mr. Calder who is in charge of this department.

Since the Cochrane election the editorials of both The Calgary Herald and Albertan have assumed a sort of beg-your-pardon strain and have even assumed a spirit of acknowledgement that the "farmers" will be able to accomplish their ends after all. They are both ready to get in the boat when they are sure it will float.

On several occasions last week the thermometers throughout the province recorded from 11 to 20 degrees below zero. This is unusual for the month of November. Last year the temperature did not drop as low as zero until December 21. It was a very hard week on stock and the scarcity of coal throughout the province made the situation very disagreeable for all.

The Grain Growers' Guide, referring to the successful U. F. O. candidate who won the election against the Hon. Mr. Motherwell, exclaimed at a meeting in the course of his campaign, "Boys, I'm going to have to sell my farm. Its interfering with my politics."—Which further proves the farmers are taking up the political game with a zest.

Shiphloads of alien laborers left the United States after the war for their native lands and thousands more have sought transportation back faster than it could be provided. It looked for a time as if the country would be stripped of its unskilled labor. Meanwhile the tide had turned and those who returned to their countries are as eager to come back to America as they were to leave, for they found conditions entirely changed, with the cost of living there much higher than in America.

### UNIQUE IN HISTORY

Premier-elect Drury, of Ontario, said on November 11, that he would not be able to announce his cabinet choices as early as he expected. He hoped to do so on Friday. It is a pleasing and remarkable instance that of the 45 farmer members elected, not one approached Premier Drury to rank for a cabinet position, a fact unique in political history. This statement comes from the Premier himself and speaks volumes for the farmers of Ontario.

### BANK SAVINGS \$150 PER HEAD

Canada in Position to Lend Four Times More Than Victory Loan Objective

The success of the Victory Loan should be overwhelming. With savings bank deposits totalling \$1,227,000,000 and the co-operation of depositors and bankers Victory Loan workers have good material upon which to work.

The figures are taken from the official statement of the Canadian chartered banks issued at Ottawa. They show another good increase in savings bank deposits, amounting to \$30,000,000 over the August figures and of \$189,000,000 over September, 1918.

The savings of the people are quite part from the commercial balances. They represent the thrift and economy which Canadians are practising in view of the Loan campaign, and it is eminently satisfactory to find that they work out at over \$150 for every Canadian man, woman and child on over \$750 per family.

As indices to prosperity and industry \$1,227,000,000 in savings bank deposits are eloquent, indeed.

Chicago with a population of 5,000,000 people has more murders in a year than England, Scotland and Wales, with their 40,000,000 people. It is said that crime in Chicago is as highly organized as any other business, and is backed by prosecuting authorities, policemen and the courts. The situation is appalling.

### CANADA'S FINE RATING

At the present time Canada's rating on the New York money market stands higher than that of any foreign nation: and it is possible for her to obtain funds on that market on more favorable terms than any other country. The reason for this, as any financier will vouch, is Canada's increased production and the prosperity she has enjoyed by the sale of her surplus products at favorable prices in Great Britain and Europe. This vast system was affected through credits for which Victory Loan subscriptions provide the working capital. If for instance the public should turn an indifferent ear to the Victory Bond salesmen now at work, our prosperity and credit would be impaired, our production dwindle and everyone would feel the menace of poverty. There is good reason to hope that Canadians are awake to their responsibility and opportunity.

The allusion to Canada's high rating on Wall St. brings up another phase of the Loan question. While Canada can borrow abroad on more favorable terms than any other nation, it is not desirable that she should do so: for that would take large sums out of the country in annual interest payments. It would help build up the prosperity of the United States at our expense. It is much more expedient that Canadians should themselves be the leaders, and that the interest should stay in the pockets of her own people. If it is profitable for Wall St. to loan money to Canada it is equally profitable for Canadians to loan money, to their country.

It will be of interest to Canadian soldiers that their old commander, Lord Byng, has retired from the army

Alderman Adams, of Calgary, demands more self-government for the cities and towns of the province. Every municipality is thoroughly tired of having their affairs dictated by men who lack knowledge of local conditions, and who offer their criticism while seated in luxurious arm-chairs at the Provincial capital.

## PROSPEROUS FARMER

Lethbridge Herald

A glance at the prize list of the international Soil Products Exposition at Kansas City this year reveals the fact that one Alberta farmer, at least, carried off his full share of the awards, and taking into consideration the fact that the past summer was one of the driest ever experienced in Southern Alberta, much credit has been given to a farmer who, in spite of such difficulties, has successfully competed with exhibitors from all parts of North America and Europe. At this exposition John W. Lucas, of Cayley, was successful in winning second prize for white oats, first for Broome Grass seed, first for peck of oats, first for peck of barley, and first for peck of rye.

Mr. Lucas' life story is an interesting one, for while much has been said and written about the country boy going to the city and there making a success, very few instances seem to have been quoted of boys, city born and bred, leaving their stores and offices and making good on the land.

### A City Boy Made Good

The career of Mr. Lucas is the story of a city boy, of no means to start with, who, feeling the call of the soil, left his "job" and is now a prosperous farmer in Western Canada.

He was born in Stratford, Ont., and states that even as a boy he always had the desire to be a farmer and to own land of his own, but the greatest obstacle to the realization of his dreams was the practical impossibility of a man without a large amount of capital purchasing the high-priced farm land of the settled parts of eastern Canada. However, after graduating from school, news came to him of free homestead lands for settlers in the west, and such an appeal was not wasted.

### Came to Alberta

Here was the opportunity to get a farm of his own. This was in 1902, and a year later Mr. Lucas located his homestead in Alberta, where he has lived ever since. Commencing with 160 acres of virgin prairie, and with no practical farming experience, Mr. Lucas has now by perseverance and industry increased his holdings to 800 acres, besides being interested in a further six and a half sections—approximately 1,000 acres. To keep in touch with the latest agricultural news and improvements, Mr. Lucas receives all the government bulletins and has an up-to-date and well-equipped library on farm and livestock topics. He is a member of the Canadian Seed Growers' Association and, in his own words: "believes that the growing of more and better seed grain is as important as the pure-bred livestock industry."

### Won Many Prizes

That Mr. Lucas' belief is well founded cannot be doubted when one glances over the list of successes he has had at agricultural expositions throughout the Dominion of Canada and the United States. He first exhibited grain in 1914, and since that time has been a steady exhibitor at provincial and international expositions.

Besides many diplomas and premiums at provincial fairs for exhibits of grains and grasses, Mr. Lucas has won the first prize for white oats for five consecutive years at the Alberta annual seed fair. At the International soil products exposition at El Paso, Texas, in 1916, he was awarded the sweepstakes for oats and second prize for barley in the open classes, as well as in the dry farming section. Again, at Peoria, Ill., in 1917, though the exposition was earlier than usual, he was awarded third prizes for white oats and barley, and field peas in the open classes, and second for oats, first for rye and first for broome grass in the dry farming section, while in 1918 he obtained second prize for field peas and third for broome grass seed.

### Believes in Mixed Farming

Mr. Lucas is one of the ever-increasing number of farmers who believe that mixed farming and dairying, rather than exclusive grain growing, is the basis of permanent success on the land, but he has found time to make a specialty of the growing of seed grain, which has been very profitable to him. Through seed selection he has produced wheat averaging 66 bushels to the acre and oats averaging 139 bushels to the acre.

The success of Mr. Lucas, both in general farming and in his exhibits is not an isolated case, but may be quoted as an example of what any person with perseverance and ability can produce from the virgin prairies of Western Canada.

It is curious how simple things seem to escape one. This is denoted by the present activity in the city in the way of putting up storm windows. Much time is spent and much trouble and expense incurred in the procedure of placing these windows outside. Has the simple process of placing them within and not without ever suggested itself?

# Which are you going to have \$45 or \$82.50

**IF** you have \$100 in the Savings Bank it will pay you 3 per cent. interest, or in fifteen years, \$45.00.

**IF** you take that money out of the Savings Bank and invest it in Victory Bonds, Canada will pay you 5½ per cent. interest on it, or in the same time, \$82.50

## BUY Victory Bonds and get more interest

### WHEAT \$2.44 AT SEABOARD

Hon. A. K. MacLean, Ottawa, who was acting minister of trade and commerce when most of the sales of Canadian wheat were made by the Canada wheat board to England, stated today that No. 1 hard was sold at \$2.44 at the seaboard during the months of August and September. It is understood that any sales since then have been about on the same basis.

The cost of living has increased in France to the extent of 61 per cent since the signing of the armistice.

There is an epidemic of smallpox in the city of Toronto.

The delayed cattle transit proceedings against the C.P.R. by a Mr. Holt was dismissed. In the instance mentioned, it was found the C.P.R. had done everything to avoid the delay.

On Tuesday the Calgary bond sellers had \$3,500,000 to their credit. They expect to reach the \$5,000,000 mark by Saturday night.

The State of Kentucky voted for prohibition in the recent elections.

### R.N.W.M.P. VETERANS

Former members of the R.N.W.M.P. have formed an organization which will tend to keep alive the splendid traditions for which the mounties have stood. To those of us who have lived in this part of the Dominion for several years we have learned to respect the riders of the plains who were the outstanding influence in bringing about the orderly development along proper lines of the country on this side of the Great Lakes. The association promises to promote imperialism, to hold itself at the service of the government when called upon, to assist each other to bring the weight of a united effort to bear upon all important questions concerning the members, and to assist the R.N.W.M.P. as it stands today. The citizens of High River and district are glad to know that the "mounties" are not to disappear, as was at one time feared, and hope to see them flourish for ever.

### MUNICIPALITY MEETING

At the last meeting of the Council of the Municipal District of Marquis, No. 157, at the Lake McGregor school house, there were present Reeve Sinclair and Councillors Shouldice, Brodick, Spankie and Lucas.

A motion was carried appointing Mr. Shouldice a committee to interview the division engineer of the Canadian Land and Irrigation Company, relative to the present dangerous condition of the bridge across the irrigation canal south of Sec. 1-19-22, west of the 4th, and ascertain if possible, their intention regarding a new bridge at that point. It was moved and carried that the By-law Committee, Messrs. Sinclair and Spankie draft a by-law covering the licensing, regulating and governing of persons having billiard, pool or bagatelle tables, or bowling alleys within the Municipality. The by-law is to be submitted to the vote of the ratepayers at the next annual election of the Councillors.

It was moved and carried that the Municipality undertake to purchase seed grain for deserving ratepayers

in the spring of 1920.

Mr. Shouldice was appointed to interview Mr. Gooderham, Blackfoot Indian agent at Gleichen, and if possible, go over the proposed new road with him, which starts between Sections 3 and 4, 21-23, west of the 4th, and leads down the hill to the B.B.R. bridge.

Mr. Berger was allowed a compensation of \$60 an acre for that portion of Section 33-20-22, west of the 4th, embodied in the Blind Line Road running east and west.

A new by-law relative to restraining and regulating of animals running at large will be drafted.

Next meeting will be held at the Lake McGregor school house, Saturday, November 15.

Coal miners in the States who are on strike say they will be out for about one month. Meanwhile all will suffer.

Three Republican Governors were elected recently in Massachusetts, New Jersey and Kentucky by large majorities.

### HENRY FORD'S SOLUTION

We clip from "The Dearborn Independent" Henry Ford's own paper, some of his views, stated in a recent issue, as regards the after-war problem of industrial unrest:

"Indeed, the air is full of counsel today, inconsistent, confusing, impracticable; and every doctrine which in ordinary times would be thrust aside as preposterous is nowadays seriously considered as if it were a neglected pearl of wisdom. Now, the whole trouble today is just a lack of things to use: A shortage of food to eat; a shortage of houses to live in; a scarcity of coal; a shortage of materials which may be worked up into articles of use and commerce; a scarcity of almost anything you care to name. And what is the remedy for any shortage of articles that can be made by the hands of man? Why, the answer is so simple that it seems frivolous even to make it. And yet in that answer lies all that the United States and the world needs to know for reconstruction. The answer is this: the labor of man produces. There is no scarcity of men. There is only a scarcity of men who believe that Work is a patriotic duty now as it was during the war. There is no scarcity of labor. There is only a slump in the productiveness of labor. Even for the higher wages, which it has a right to receive, labor is not producing as much as it did for lower wages. It would be easy just at this point to steer this discussion off into side issues. Any number of matters may be brought up, principally questions of past industrial dispute.

We used to say, "Work will win the war." Well, it is true now that Work will save the country. Wages must be kept as high as possible. In many branches of industry wages ought to be increased forthwith. It is utterly foolish to think that a reduction of wages would be followed by a reduction of prices, because only an increase in production can bring a decrease in prices, and a reduction of wages is one of the surest methods of preventing an increase in production. Men must be paid to work, they must be stimulated to work, and more than that they must be shown that today the country's whole welfare rests on their working. Men will not work with a will if they believe that all their effort is merely going to increase the dividends of idle stockholders or the private fortunes of men already too rich for the good of society. But would they not work with a will if they knew that the country depended on their production?

This appeal to patriotism cuts both ways. The employer who puts a damper on production by talking as if his employees and never himself should bear the burden of cuts in prices, is not a patriot. His duty is to stimulate production and the one way this can be done is to make it well worth while for the producer."

### CLEVER BOND SELLER

The Halifax Chronicle, of October 31st has an interesting article in which we are told an energetic Victory Bond canvasser, boarded the White Star Liner, Adriatic, and sold \$275,000 of Victory Bonds to passengers on the ship, during their brief and unexpected stay in Halifax. This entitled the ship to a Prince of Wales flag, which was unfurled from the mast of the great steamship as she departed for England.

The Lapland docked the following day and was boarded by a bond seller who sold \$30,000 worth to passengers.

On November 3rd, the Mauretania steamed into port and again the indefatigable bond seller was on the scene and succeeded in selling \$317,000 in bonds. This was a new record and when the Mauretania departed, a Prince of Wales flag with eight crests was presented the ship.

### SHOULD ABOLISH HAZING

So long as "hazing" is permitted in our universities, there will be a reluctance among parents to allow their sons to enter these schools of learning. At Edmonton, there is much disfavor shown at the scandalous behaviour of the sophomores which resulted in severe injuries being inflicted on some of the boys.

In Saskatoon, one young man died from the effects of hazing and at Colgate university one young man of promise was drowned. The guilty parties should be tried for murder in the first degree. Hazing is a brutal, silly custom.

These are the times that call for courage, cheer and sane optimism. The world will yet sit down and stop rocking the boat. Suppose we talk occasionally, when we meet, of our hopes instead of our fears. We used to think we would be grateful when the war ceased to demand its daily toll of human life. Have we forgotten those dreadful days so soon? —Call.

### MORE WEATHER

A Variety of Indian Summer Where a Red Hot Stove Takes Leading Role

Every time it warms up the least bit some frivolous minded person remarks, "Indian Summer," which has the effect of chasing away all pending "chinkies" and bringing winter howling about our ears with a vengeance. As far as Indian summer is concerned, all we have seen so far has been mostly Indian, and wild and woolly at that.

Saturday last was rather frosty and towards evening the inclination of the thermometer was toward rising. On Sunday morning it was positively warm and in the afternoon the snow began to form little rivulets as it slowly disappeared. Then some one came along with the fatal remark, "Indian summer" and right away the sunny smile on nature's face froze stiff and a blizzard laden wind stole down upon us. As a result, we are once more looking for kindling, lugging coal up the cellar stairs, softly cursing matches that break before lighting and telling each other how confounded-rip-snorting cold it is—and we are.

### NEARLY ASPHYXIATED

What might have developed into a double fatality occurred at the home of Mr. F. O. Woodhouse, who lives west of High River in the Meadowbank district on Tuesday night last, where Mr. and Mrs. Woodhouse were nearly asphyxiated by coal gas fumes from their stove. During the day, Mr. Woodhouse had been in town and purchased a supply of coal. In the evening after putting in the usual supply in his base burner, the family retired. During the night, the gas fumes escaped from the stove into the living room and bedroom in which Mr. and Mrs. Woodhouse slept. At six o'clock Mrs. Everett, who resides there, observed a peculiar smell of gas and went into the room to see if everything was all right and she found both Mr. and Mrs. Woodhouse unconscious. She then telephoned to High River for medical aid and Dr. Buswell hastened out and applied restoratives. Mrs. Woodhouse recovered first but it was some time during the afternoon before Mr. Woodhouse regained consciousness. They were both in a very precarious condition and it is indeed fortunate that they received attention so early in the morning, otherwise the result would have been fatal.

**PROVINCIAL ITEMS**  
The Prince of Wales will sail for England today on the Renown.  
The citizens of Montreal subscribed \$53,000,000 for Victory Bonds.  
Foster predicts a severe storm between Nov. 20 and 28. Well, it can't be much worse than we experienced last week.  
I. G. Van Wart, former sheriff of Calgary, now residing in Toronto, is seriously ill and it is feared he cannot survive.  
President Coste, of the Gas Company, says that pipe which formerly cost \$1.00 a foot before the war was now worth \$3.00 and drillers were paid from \$12 to \$15 a day.  
The Bassano Mail complains about the dearth of eggs and butter in a district that should excel in these products. The same applies in nearly every district in Alberta.  
On Saturday last, the citizens of Calgary had oversubscribed their quota by one million dollars. The money of this province is nearly all in the cities, that is very evident.  
Major Andrews, of Winnipeg, in the House of Commons, disapproved of any policy involving indiscriminate handouts to soldiers but thought that the absolute needs of returned men should be cared for.

The inter-church Forward Movement organizers at Calgary are getting right down to work and there will be a series of inter-denominational consultations held shortly throughout the Province.

In connection with the G. W. V. A. plan of gratuity for soldiers, the amendment moved by Major Andrews comes near what they want as it calls for an expenditure of \$200,000,000 instead of \$50,000,000, as moved by the parliamentary committee.

There were 31,000 cattle on sale at the Chicago stock yards on October 20th. Seven thousand of these were western steers. Grain fed cattle were strong, top prices being \$19.50. There never was a time when grain fed cattle were so scarce.

A farmer near Brooks, Alberta, received a revenue of \$9,000 from 12 acres of alfalfa land. He recently threshed his crop of alfalfa and got 14 bushels to the acre. The seed is worth 85 cents a pound and every pound can be sold in the district.

From Edmonton, the report comes that there are more jobs up there than there are men to take them. At present 1200 men are required for tie making and lumbering in B.C., and big wages are offered by the labor bureau of that city.

In view of the fact that a certain number of citizens are talking of drilling for gas in High River, it is rather discouraging to hear Mr. Coste, of the Calgary Gas Company, state that in ordinary times to cost \$30,000 to drill a well, and that the cost now is over \$40,000.

The public school teachers of P.E.I. threaten to go on strike. Men, many of them married, get the munificent sum of \$500 per year and women teachers receive \$400. The wonder is that they do not all come out west in a body where they can get without any delay \$1,000 per year.

Considerable telephone construction work has been done in this district, and strange to say, it was for political purposes. At Cochrane the telephone men were at work there and the U. F. A. supporters condemned the Government for what they termed "wholesale bribery."

The Calgary Gas Company offers to spend more money on their gas plant providing the rates are increased. If the company is allowed to charge 40 cents per thousand cubic feet for domestic use they will spend the full amount over and above 35 cents in development work.

**MORE PRODUCTION**  
J. R. Clines, the deputy leader of the labor forces in the British House of Commons, in a recent statement, says that "the scarcity of commodities is the opportunity of profiteers," and that "workmen who deliberately restrict output or who fail to accept any form of industrial development which will make their labor more productive are punishing themselves and their class without knowing it." John Hodge, another labor representative, states that: "if we want increased wages and shorter hours, the only way of paying for it is by increasing production." And so on from many leading labor men who assert that the only hope for permanent relief from the economical troubles which disturb the nation is for its workmen to produce more.

**TWO DOT RANCH SOLD**  
George Lane has recently added to his already extensive holdings by the purchase of the Two Dot Ranch near Nanton, at a price in the neighborhood of \$100,000 it is announced. The sale included the land only, which makes the price per acre about \$25. The stock is to be removed to the Rosebud district. The ranch was sold to Mr. Lane by Messrs McFarland and Armstrong, who purchased the ranch in 1916. The ranch was located 35 years ago, and first changed hands 15 years ago when it was purchased by Pemberton & Ward.

Parents who have blind children and adults who have become blinded through misfortune, will be pleased to realize that at Toronto, Winnipeg and Vancouver, through the instrumentality of the Canadian National Institute for the blind, workshops for the teaching of the blind have been established. Canada's treatment of her blind is a credit to the nation.

In order to encourage as many farmers and stockmen of Alberta as possible to attend the forthcoming International Live Stock Show at Chicago, and also to enjoy the trip going and returning, arrangements are being made for the exclusive use of one or more standard sleeping cars on the Canadian Pacific Railway, which will leave Calgary probably on Thursday, November 27, returning after the show. If you wish to reserve accommodation write Alex Galbraith, Superintendent of Fairs and Institutes, Edmonton.

**OSTEOPATHIC PHYSICIANS**  
Drs. Church, Plummer and Siemens, Osteopathic Physicians, who recently moved to the Grain Exchange Building, where they have acquired a large suite of offices, have added another member to their firm in the person of Dr. S. M. Stern, who has recently arrived from the States. Dr. Stern comes from a family of Osteopaths, there being several members of the immediate family who are practicing Osteopath Physicians. His father has been located in St. Paul, Minn., for the past twenty years.  
Dr. Stern has had some years of experience in practice, and has made a specialty of Obstetrical work. This completes the Osteopathic profession in this city to handle all kinds of cases by Osteopathic Physicians. Dr. Stern has recently been discharged from the U.S. army, having spent several months in France.  
Dr. Stern will be located, permanently with Drs. Church, Plummer and Siemens at 301 Grain Exchange Building.

**THE TWO SOULED WOMAN**  
"The Two-Soul Woman," which is the feature play at the Community Theatre, Saturday evening, November 15, introduces Priscella Dean in a role such as few stars on either the speaking or picture stage attempt. Priscella, who has become famous for the quality of her work, takes the dual part, characterizing, at one moment, a beautiful well-behaved young woman, obeying all the laws of society, and the next, while under the hypnotic influence, becoming a hateful impossible woman who overrides every moral law. The fact that it is a Priscella Dean picture is a guarantee to movie fans that they will get their money's worth, for this star never has and never will have a peer in a mediocre play.

The Prince of Wales has arrived in Washington and was accorded a very generous welcome by the American people whose enthusiasm broke into a loud burst of cheering.

During the Armistice parade of American soldiers in Chihalis, Wash., I.W.W. and aliens from a point of vantage shot and killed a number of the soldiers in the parade. The soldiers raided the building and captured some of the members. One was later lynched.

NOTICE  
TO CREDITORS AND CLAIMANTS

In the Estate of ALEXANDER DAVID ROSS, late of Vulcan, Farm Labourer, deceased.

Notice is hereby given that all persons having claims on the Estate of the said Alexander David Ross, who died on the 27th December 1918, are required to file with the undersigned by the 18th November, 1919, a full statement, duly verified, of their claims and of any securities held by them, and that after that date the Administratrix of his estate will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed, or which have been brought to her knowledge.

Dated this 23rd October 1919.

Herbert J. Maber,  
Vulcan, Alta.,  
Solicitor for the Administratrix.  
29-3c

D. C. Coleman, vice-president of the C.P.R., speaking of the car shortage, throws the entire onus of the shortage on American roads for not returning promptly stock cars belonging to the company. It is a well known fact that the Americans have formed the habit of holding C.P.R. cars as long as they can, which is not a friendly act, to say the least.

## POLICE COURT CLIPPINGS

On November 6th W. A. McNally appeared before Mr. J. A. Lindsay and Mr. E. J. Charter, J.P.'s at Vulcan, charged with cruelty to a team of horses by allowing them to remain on the street unprotected from cold for a period of three hours. Accused pleaded guilty to the charge and after having been warned by the justices as to the serious nature of the offence, was fined the sum of \$5.00 and costs.

On the 8th inst. Sam Raell, T. N. McKie and A. Granlin were arrested by Corporal Allan, of the Provincial Police at Vulcan and charged under Section 77 of the Alberta Liquor Act with being intoxicated in a public place. The accused all pleaded "not guilty" and after evidence had been submitted by the police as to the condition at time of arrest and a small quantity of liquor submitted to the court as exhibit, accused was found guilty and a fine and costs inflicted. The defendants, McKie and Granlin pleaded guilty to the charge, and a fine and costs was inflicted in each case.

The Lethbridge irrigation project will cost \$37 per acre for water according to the latest engineering figures.

## GOLDEN RULE W. I.

The regular meeting of the Golden Rule W.I. took place on November 6, at the home of Mrs. C. N. Howes. Despite the winter weather and the necessity of driving horse we had a good attendance, also several visitors. Mrs. H. Galbraith gave a very interesting paper on "How we are governed." We decided at this meeting to change our meeting time to 1 p.m. instead of 3 p.m. during the winter months.

Our annual meeting will take place on December 6, at 1 o'clock in the Alston School. We hope to have a large attendance at this meeting.

Our next meeting will be "Question Day" and will be held on November 20 at the home of Mrs. G. E. Voisey. Come and bring along that question you have been wondering about.

Teacher, to small boy at the local school—"What is a liquidator?" Boy—"Please, miss, one who drinks Lethbridge beer."

If the farmers were allowed fifty per cent. turn over, \$3,000 a year salary as manager, ten per cent. for "overhead," the proper allowance for depreciation, insurance against frost, hail, drouth or blight, wheat would be a 'durn' sight higher than \$2.15.—Exchange.

## GENERAL NEWS OF INTEREST

Hay is being shipped into Macleod at the rate of two cars per day. The shortage is very acute.

President Arthur Haselden has resigned as president of the Calgary branch of the G.W.V.A.

Dodge Brothers, Limited, automobile manufacturers, have decided to open a large plant at St. Thomas, Ontario.

Sir Thomas Lipton is in New York in connection with his yacht, Shamrock IV, the challenger for the American Cup next year.

Lord Jellicoe, former commander of the British Navy will not remain in Calgary as anticipated. He was to speak before the Canadian Club.

Canadian millers received contract for half a million barrels of flour on behalf of Great Britain and Europe. The cost will be in the neighborhood of \$5,325,000.

A C.P.R. conductor purchased a goose down the line, and tied it up outside the caboose to freeze. It is alleged a section man cut down the goose and appropriated it, but the irate owner ran him down and recovered his property.

A report from Vancouver says the sugar famine will be relieved this week by the arrival of 3,000 tons of raw sugar from abroad. We sincerely hope so. At High River we have had a famine in respect to sugar for the past month.

The Great War Veterans of Calgary accuse Major Redman, M.P., Calgary, of breaking his pledge with them in connection with his stand on the gratuity question. At a meeting of the executive they alleged bad faith on his part and ask for his resignation.

Mr. Justice Ives gave a Jenner, Alberta, resident \$200 damages against the town on account of "obnoxious odors" issuing from a "dump" which the town had deposited on adjacent land. There are many towns and villages in the Province liable for damages on the same grounds.

During the course of Hon. Mr. Calder's speech in the House of Commons on the gratuity question, Col. J. A. Currie and Dr. Cowan, of Regina, got into a scrap. The Colonel slapped the Doctor's face and the latter retaliated by hitting the Colonel on the head with his cane.

German music, barred in France during the war, has again appeared on the programmes of concerts, and is being heard in theatres. As a Paris paper comments: "why not take advantage of the music of a conquered foe, considering it one of the spoils of war."

A New York beggar, upon being investigated by the police, was found to be the owner of an expensive automobile and considerable cash, which goes to prove that there are many opportunities for wealth before the young man of today. Swallow your pride, become a beggar, and the rest is easy.

An auto driven by a woman in Calgary on Friday last collided with a street car, and deflecting, ran into a home at the corner of 4th Street West and 14th Avenue. The auto smashed through the house into a bedroom occupied by a young girl asleep, who was slightly injured by the crash.
